And one of my favorite games was (a board game, not a video game) Swedish war, which is an old school, silly war game where you play as either one of two European countries who are vying for victory. I loved the fantasy, the goofy medieval setting, and the whole experience. When I eventually ventured into model building I was also drawn to Swedish war. I bought several books on the subject, and I built a couple of buildings based on the fortresses I used in the game. The only problem was that I didn't enjoy modeling as much as I did designing for the game. After a while, I became disillusioned with the game, and focused my efforts on designing for Swedish war. Today I decided that I was going to do something new. The battle for knowledge of the Netherworld has been raging for years, and I was thinking about it for a while.
