CHOOSING THE RIGHT FORM As with other art forms, fine art comes in a great variety of forms and styles. The following types of art are seen more often than most: **Oil painting:** Oil painting is one of the oldest, and one of the most commonly used, forms of fine art. Oil painting is still used in the creation of many paintings today. There are four basic steps involved in the creation of an oil painting: 1. **Drawing:** The artist creates a sketch using any of a variety of drawing tools or devices. This sketch is the foundation for the painting. 2. **Applying the paint:** A priming, or underpainting, of a color used to blend the painting together and add texture is often applied before completing the final step of the painting. 3. **Completion of the painting:** The artist adds details and colors to the completed work that provide the form, details, and colors of

the object being painted. 4. ****Etching, cleaning, and finishing:**** The etching, or removal of the painting from the

The Artistry of Brown Butter Poached Pears with Cranberries (and Coriander) There's really nothing better than a warm, ripe, deep brown pear in autumn, straight from the vine. The leaner, softer, sweeter variety of the pear, such as the Bartlett, or a Bramley, has been called the "pear of the gods." If you want to take it up a notch, we love to poach pears in dessert, with a splash of lemon and a dash of cinnamon, then finish in the oven. But it's a stretch to say they're divine. Instead, we prefer to simply embrace the

ripe qualities of this pear and pair it with a sprightly complement. The combination of cranberries and fresh coriander is a rich one, with more than a hint of citrus. But we like to take a more restrained approach to sweet and sour, and our Coriander and Cranberry Poached Pears are a delicate, modest version, with hints of vanilla and a swath of creamy brown butter. Together, they make a creamy and perfectly balanced dessert. We try to make a maximum impact in the simplest dishes, and this one is no different. It might seem like a lot of fuss, but the secret is in the sumptuous brown butter, which is a quick and easy finishing trick. The other ingredient, a coriander-and-cranberry powder, is just as easy to make, but the infusion of fragrant leaves balances out the sweetness of the pears. If you'd like to make these for a dessert course, the custard makes use of the juice from poaching the pears and sweetens the cream further, but you can leave the dish off the menu if you prefer. Make a light dish with the sauce to start, or let it sit, chill, and thicken. The point is, a little is just enough, and you can experiment with different kinds of pear and flavorings to create your own.

Q: How to automatically convert a JSON string to a form usable in a Rest API I am making a REST API and have already written a lot of server side code. The problem I have is that the requests that are being sent into the server are having the payload in a format that can't be read by Java because it is a JSON string and the request body is a string/map. Example:
